

The Proposal to have all broadcasters record and archive thousands of hours of broadcast time presents all broadcasters but especially small market boradcasters an expensive and burdensome requirement. Responsible broadcasters busy serving their communities with hours of public service, local news, sports play by play, farm reports, school closings, helping find lost dogs, broadcasting weather emergencies, publicizing at no cost every charitable effort in town. And doing all this without ever even being threatened with a single indecency complaint. These broadcasters should be exempt from this new expensive requirement.
